ABSTRACT

The tables in this report present data on the typical charges to students for the academic year 1968-69. Included are data on tuition and required fees, room and board, classified by the students' level (Undergraduate or graduate), sex (for room and board charges only), and residence. The institutions making these charges are classified by institutional size, control, and level of offering. In addition, the tables differentiate between charges for in-state and out-of-state students. (Author/HS)

BASIC STUDENT CHARGES 1968-69

by Arthur Podolsky
Higher Education Surveys Branch

The tables in this report present data on the typical charges to students for the academic year 1968-69. Included are data on tuition and required fees, room, and board, classified by the students' level (undergraduate or graduate), sex (for room and board charges only), and residence. The institutions making these charges are classified by institutional size, control, and level of offering.

Two categories are shown on the tables for student residence: in-district and out-of-State. An in-district student is one whose residence is in the same district or political subdivision as the institution. For institutions under State control, the district is the State. It will be noted that the questionnaire requested data for a residence category not shown in the tables: "In-State but not in-district students." This category is not shown in the tables because there were too few differences from the in-district data to warrant the development of meaningful measures.

In these tabulations, the classification by level of offering groups institutions into (1) universities--institutions that stress graduate instruction and research, confer advanced degrees, and have at least two professional schools that are not exclusively technological; (2)

other 4-year institutions--liberal arts colleges, teachers colleges, technological schools, and other professional schools; and (3) junior colleges and institutions with programs of at least 2 but not less than 4 years duration.

Cost category included the tuition and required fees, room, and board charges that were typical or most common for the student enrolled. The distributions shown for the total of these charges are based solely upon institutions charging for all three categories and excludes about one-third of the institutions which do not charge for one or more of the categories. For example, an institution is not included in the total if it has no set charge for board but, instead, has a pay-as-you-go cafeteria or if it receives "charitable donations" instead of charging tuition. Institutions are included, however, in the categories for which charges are made.

The data on student charges were obtained primarily from respondents in the Office of Education's annual "Higher Education General Information Survey." Completed questionnaires were returned by about 75 percent of the institutions surveyed. Information on charges of nonresponding institutions was obtained from college catalogs and by telephone. The data shown thus cover all institutions in the U.S. Office of Education's higher education universe.

The data shown are for academic years. Institutions were provided with factors with which charges for semesters, trimesters, and quarters were converted to annual rates, namely 2, 2.4, and 3 respectively.

Table 1 shows a summary of the basic student charges for publicly controlled institutions by level and enrollment size; table 2 shows these data for privately controlled institutions. In using the tables, the reader should be aware that the data shown for individual student charges will not add to the data shown for the total charges because the percentiles are calculated separately for the total and for each component part.

Schedule VI of the Projections in Higher Education form (OE 2300-6, 1-68), from which these computations were derived, and the related instructions are shown in the appendix.

1/ IF APPLICABLE FOR LESS THAN 7 DAYS PER WEEK, ADJUSTED FOR COMPARABILITY.

SCHEDULE VI – BASIC STUDENT CHARGES

GENERAL INSTRUCTIONS

1. It is recognized that tuition and required fees, room, and board charges are not the same for all students at an institution. Therefore, it is requested that the projection of the typical, or most common, charges for the academic year be reported herein for each of two categories – undergraduate and graduate.

2. For purposes of this report, consider 2 semesters, 2.4 trimesters, or 3 quarters as equal to an academic year *(9-months)*. Please use these multiples in converting terms *(semester, trimester, or quarter)* charges to academic year charges.

3. If the institution has a single lump-sum charge for tuition, required fees, room, and board, please apportion the lump-sum charges among the appropriate categories.

4. Omit cents in reporting dollar amounts.

DETAILED INSTRUCTION

1. Tuition and required fees:

ITEM A. Undergraduate students are those who have not obtained a bachelor's degree: *(1)* All students in bachelor's degree programs which require at least four years but fewer than six years of college work; and *(2)* All students in occupational or general study programs which require 1, 2, or 3 years of college work and which are designed to prepare for immediate employment or to provide general education rather than as the first 1, 2, or 3 years of a bachelor's degree program.

ITEM B. Graduate students are those who have attained at least one standard bachelor's degree or first-professional degree and are or could be candidates for master's or doctor's degrees.

2. "In-district" students are those living in and attending an institution operated by the same district or political subdivision within a State as the institution. "In-State but not in-district" students are those living in the State but not living in the district in which they are enrolled. If there is an additional fee for in-State students from outside the district of the institution, and the fee is charged to the student and not to the home district of the student, the sum of this additional fee and the regular fee for in-district students should be entered in Item A2b *(Line 3)*. The foregoing is applicable to undergraduate and graduate students.

3. Report room and board charges and number of students housed:

ITEM C. Report as room charge *(academic year)* the most frequent or modal charge to a typical student sharing a room with one other student.

ITEM D. Report as the board charge *(academic year)* the modal charge to a typical student. Please check the number of days per week for which the board charges are applicable *(5, 6, or 7)*.

ITEM E. Please enter in the appropriate columns the designed capacity of existing residence halls and the number of men, women, and married students living now and expected to live in housing owned or operated by the reporting institution.

COLUMN INSTRUCTIONS

COLUMN *(b)*. Report the design capacity of existing housing owned or operated by this institution.

COLUMN *(c)*. Report current charges to a full-time student attending this institution. In Section E, report the actual number of students living in owned or operated housing.

COLUMN *(d)*. In Section E, report number of students expected to be housed. This includes the housing expected to be added also.

CORPORATE NAME OF INSTITUTION	1. INSTITUTION CODE NUMBER

SCHEDULE VI - BASIC STUDENT CHARGES

NOTE: PLEASE REPORT ONLY WHOLE DOLLAR AMOUNTS; OMIT CENTS.
